

MI5.7 Feed Life cycle assessment (LCA) - Appendix 2 Proxy List

In this appendix, companies are provided with a clear procedure for selecting appropriate proxies based on ingredient identification and database references.

Each ingredient is listed in the first column under the heading "Ingredient and (EU catalogue number)". This column identifies the relevant raw material by its common name and, where applicable, its official EU catalogue number.

The second column, titled "dbflow_GFLI", provides the corresponding database entry or reference for each ingredient, based on the GFLI (Global Feed LCA Institute) database flow. This value serves as the primary input for proxy selection.

PROXIES		
Number ^{1 2}	Ingredient	dbflow_GFLI
005167-EN	Apples dried (slices)	Former food product dried (>80%dm), without carriers, at processing/ XX ³
1.1.4	Barley Flakes	Oat grain peeled, at processing/ XX ³
/	Bentonite	Total minerals, additives, vitamins, at plant/RER Economic
13.1.1	Bread flour	Former food product dried (>80%dm), at processing/NL Economic
/	Calcium formiate	Total minerals, additives, vitamins, at plant/RER Economic
4.3.5	Carrot, dried (pieces)	Former food product dried (>80%dm), without carriers, at processing/ XX ³
